From Lyndon LaRouche
May 24, 2008

Her Imperial Majesty, **LADY GORGON MACBETH**

A terrible vengeance is now descending, by her foul hand, upon she, your enemy, the enemy of all mankind.

That enemy's dearest treasure, the power of her money, is being ripped away by those very storms which destroy that inflation, in an even greater amount and degree than her bloated mass of money inflates still further. It is that queenly she, she, herself, who, with her minions, inflates the fires of her own and their destruction.

This occurs, presently, in the greatest raging storms of hyperinflation and vast hunger, in our known history of mankind.

She, our enemy, who might destroy us, too, is seeing her power destroyed by her own, cruel hand. Ill-fated beast that she always was, like Shakespeare's bloody Lady Macbeth,

she brings about her own doom by the very hand with which she strikes against us, her intended prey.

Yet, for us, there remains a chance to survive. Let her reign in whatever Hell she has chosen to bring upon herself and her lackeys; but, our world, she shall not have for her intended future reign.

We, not she, nor her lackeys, are the people of the world. It is our world, which she and her kind have soiled too long. Begone! Witch! You are surely doomed this time. Heavens above and Earth below have caught you, witch, between them. Go witch! Be gone! And take your stinking lackeys with you as you go.

You, Great Bitch, are their curse, and they, like Felix Rohatyn, George Soros, and George Shultz, are your companions.

LaRouche's Three Steps to Survival

1. My Homeowners and Bank Protection Act of 2007 must be adopted and set into motion immediately. If not, the situation of the U.S. becomes quickly hopeless.

2. A two-tier credit system, in which a) U.S. government credit for physical-economic recovery programs is provided at between 1-2%, and b) other utterances of credit-injections float more or less freely.

3. The U.S.A. government must now immediately

approach the governments of Russia, China, India, and others for the prompt establishment of an international emergency fixed-exchange-rate system, ending the presently hopelessly bankrupt floating exchange-rate system.

Under that latter, proposed agreement, long-term treaty-agreements shall be focussed on intergovernmental development of capital-intensive types of essential basic economic infrastructure: rebuilding the power, water, and transportation infrastructure of the world.
