

It Is Time To Fight for the Republic: Stop This Coup Now

After nearly four years in which the British and U.S. intelligence agencies have constantly pursued the destruction of candidate and then President Donald Trump, as a “Putin agent”, it is time that patriotic Americans move up to a higher level of this fight against British imperialism.

This blatant “color revolution”, or attempted coup d’etat, now calling itself an “impeachment” of the President—and never having made a single sane case or argument to the American people—must now be defeated. There is a brief but wide-open window of opportunity to stop it now, because powerful new evidence has exposed the ugly CIA/NSC/British MI6 hand waving the Democratic Party puppet. The late statesman, American System economist, and British intelligence nemesis Lyndon LaRouche insisted on principles to win a really important political fight: Keep flanking the enemy on a higher level; keep raising the understanding of your own forces to a level above the enemy’s thinking.

Imagine, already, that we have lifted the President to a higher ground: He is fighting for his Moon-Mars mission “Project Artemis”, and his policy of cooperation with the other spacefaring powers for peace and progress, against a Democratic Party which has been forced to abandon impeachment and go to election on the “green new deal”. He is backed by the growing “Committees of Correspondence” of Lyndon LaRouche’s Political Action Committee, LPAC, with LaRouche’s full “four laws” program to rebuild the American and international economy. With Wall Street set to crash again, LaRouche’s movement is crowding Congress to break up the Wall Street

megabanks with the Glass-Steagall Act, and establish a Hamiltonian National Bank so that we can build new infrastructure, here and in South America and Africa.

That is the level this war against the coup can get to, by expanding now to bring in many more Americans, and get them moving others into action. The “impeachment” phase of this coup is putting on its last fake picture show during this month; it can, potentially, be shut down and go no further. But the underlying attempt to remove Trump from Presidential power, now four years old, is not a partisan Democrat matter, but a British intelligence attack, involving U.S. intelligence agencies sedition—the word of Attorney General Barr.

The intelligence agencies’ conspirators and their national media megaphones will not give up without being decisively defeated. President Trump can win battles in this war—he has already won some. But he cannot win the war unless Americans think and act bigger than you have been willing thus far. This must become, more and more, a mass movement against these agencies’ trying regime change in America.

The larger that movement of “Committees of Correspondence” becomes, LaRouchePAC will always have the correspondence, the weapons to circulate through them. Right now, Scott Ritter’s “The ‘Whistleblower’ and the Politicization of Intelligence” in Consortium News Nov. 27; and Barbara Boyd’s LaRouche PAC lead on Nov. 29, “The Third Phase of the Coup: Treason in High Places, as the Fascist Ukraine Coup Comes Home to Roost in the U.S.”; are crucial.
